Analysis:
The theme of practice is “Connection”. My idea was to express connection between people, relationship, specifically love. I thought it is one of the strongest bonds that people can experience. I wanted to show connection that can happen between two souls just from little things like quick gave, light, gentle touch, help in a rainy day. I also interpreted old belief about “red string of fate” that connects two soulmates. Images for short story about a couple that met each other during rain and end up under one umbrella. Process consists of making illustrations in Adobe Illustrator, then, converting them into After Effects, putting together with lines, to imitate continuous line, alluding to the theme “connection”. After, by using camera I created non-stop motion to tell story. The background colours were added for style and finished, polished appearance, pastel colour scheme. I adore the style that I worked in during this project, as well as the final outcome. Even if it is short and not that dynamic, or has flaws in terms of editing, I still thing about it positively.
